Ivanhoe Mines files NI 43-101 technical report on the Definitive Feasibility Study for the Platreef platinum-group metals, nickel, copper and gold project in South Africa

VANCOUVER, CANADA – Ivanhoe Mines (TSX: IVN; OTCQX: IVPAF) today announced that, further to its news release dated July 31, 2017, the company has filed a National Instrument 43-101 (NI 43-101) technical report on the independent definitive feasibility study (DFS) for the Platreef platinum-group metals, nickel, copper and gold project in South Africa.

The independent NI 43-101 technical report for the Platreef DFS was prepared for Ivanhoe Mines by principal consultant DRA Global, with economic analysis led by OreWin, and specialized sub-consultants including Amec Foster Wheeler, Stantec Consulting, Murray & Roberts Cementation, SRK Consulting, Golder Associates and Digby Wells Environmental. The report – titled **Platreef 2017 Feasibility Study** – has been filed on the SEDAR website at www.sedar.com and on the Ivanhoe Mines website at www.ivanhoemines.com.
