An audio webcast recording of the conference call, together with supporting presentation slides, will be available on Ivanhoe Mines’ website at [www.ivanhoemines.com](http://www.ivanhoemines.com).

Ivanhoe also expects to release the results of new, independent feasibility studies for the Platreef and Kipushi projects in the coming weeks, as well as an update on development and operations activities at Kamoakakula.

After issuance, the Financial Statements and Management’s Discussion and Analysis for the year ended December 31, 2021, will be available at [www.ivanhoemines.com](http://www.ivanhoemines.com) and at [www.sedar.com](http://www.sedar.com).

### **About Ivanhoe Mines**

Ivanhoe Mines is a Canadian mining company focused on advancing its three principal projects in Southern Africa: production from, and expansion of, major new, mechanized, mines at the Kamoakakula copper joint-venture in the Democratic Republic of Congo and at the Platreef palladium-rhodium-platinum-nickel-copper-gold discovery in South Africa; and the extensive redevelopment and upgrading of the historic Kipushi zinc-copper-germanium-silver mine, also in the Democratic Republic of Congo. Ivanhoe also is exploring for new copper discoveries on its Western Foreland exploration licences in the Democratic Republic of Congo, near the Kamoakakula Project.

Kamoakakula began producing copper concentrates in May 2021 and, through phased expansions, is positioned to become one of the world's largest copper producers. Kamoakakula is powered by clean, renewable hydro-generated electricity and is

**projected to be among the world's lowest greenhouse gas emitters per unit of metal produced. Ivanhoe Mines has pledged to achieve net-zero operational greenhouse gas emissions (Scope 1 and 2) at the Kamo-a-Kakula Copper Mine.**
