## **Ivanhoe to host an Investor Day on December 3, 2020, to discuss new feasibility study and phased-development plan for the world-scale Platreef palladium, platinum, rhodium, nickel, copper and gold project**

JOHANNESBURG, SOUTH AFRICA – Ivanhoe Mines (TSX: IVN; OTCQX: IVPAF) is pleased to announce that it will hold its second virtual Investor Day on **Thursday, December 3, 2020**, to discuss the findings of the recently-announced independent engineering studies, including the accelerated phased development plan, for the world-scale Platreef palladium, platinum, rhodium, nickel, copper and gold project in South Africa.

The Investor Day will include a virtual site tour of the Platreef Project, as well as remarks from Ivanhoe’s Co-Chairs Robert Friedland and Yufeng “Miles” Sun; the company’s President and CFO, Marna Cloete; and members of the company’s corporate development and technical teams. It also will feature a question and answer (Q&A) session.

Details of the Investor Day and the registration link are:

**DATE: December 3, 2020**

**TIME: 10am Eastern / 7am Pacific / 3pm London / 11pm Beijing**

**REGISTRATION LINK: <https://bit.ly/3pVhper>**

To submit a pre-event question, please email it to [info@ivanhoemines.com](mailto:info@ivanhoemines.com) for Q&A review.

### **About Ivanhoe Mines**

Ivanhoe Mines is a Canadian mining company focused on advancing its three principal joint-venture projects in Southern Africa: the development of major new, mechanized, underground mines at the Kamoakakula copper discoveries in the DRC and at the Platreef palladium-platinum-rhodium-nickel-copper-gold discovery in South Africa; and the extensive redevelopment and upgrading of the historic Kipushi zinc-copper-germanium-silver mine, also in the DRC. Kamoakakula is expected to begin producing copper in July 2021 and, through phased expansions, is positioned to become one of the world's largest copper producers. Kamoakakula and Kipushi will be powered by clean, renewable hydroelectricity and will be among the world's lowest greenhouse gas emitters per unit of metal produced. Ivanhoe also is exploring for new copper discoveries on its wholly-owned Western Foreland exploration licences in the DRC, near the Kamoakakula Project.
